Access EducationCity at Home

Dear Parent and Carers

As mentioned in the last newsletter, school have bought into a subscription to EducationCity, a leading online teaching, learning and assessment resource for pupils aged 3 upwards.

We will be using this resource in school to support learning in lessons but we have also bought into the option to extend our access, allowing your child to use EducationCity at home too, which has been charged to us in our subscription.

If you would like to support the school in this, we are asking for a £2.00 contribution per child, per year.
By allowing EducationCity to be used at home, your child will be able to access fun, engaging activities that will help to reinforce what they're learning in school and allow you as a parent to support learning at home.

Login details will allow your child to access EducationCity from any device that has internet access. Should you not have reliable internet access at home, your child will be able to use the facilities at school or the local library.
Please let us know if you wish to contribute by completing the slip at the bottom of this page.

When all our parents have responded, we will then send out details on your child's personal login information so that you can start to access EducationCity at home too (hopefully before the February half term break).

Should you have any questions regarding EducationCity, please do not hesitate to ask.
